

AUTOMAIL™ PRO

A Partnership Solution

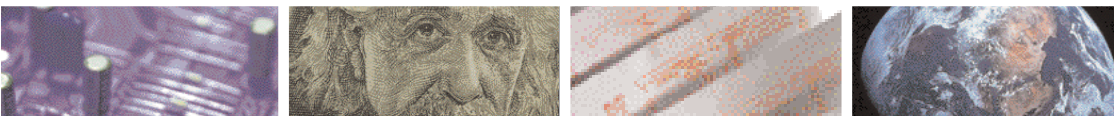

Postal customers, who regularly process large volumes of mail, consider postage a major cost of doing business. Discounts on postage can be significant when the savings per item are multiplied by the total number of items mailed each day, week, month, and year.

Automated rates provide a substantial incentive to use technology to its fullest; to use computers and software to quickly

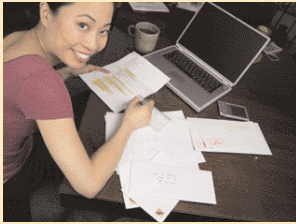

and efficiently code and sort mail, to meet automated standards and qualify customers for major savings.

WAUSAU has formed a strategic alliance with SynTel™, LLC to offer AutoMail™ PRO. This mailing software is specifically programmed to automate bank mailrooms that conduct mailings of 500 or more pieces.

Reinventing Financial Solutions.

AutoMail™ PRO

Address quality is the key to automation compatibility, barcode

accuracy, presort accuracy, carrier route coding, and postage payment accuracy. It is also the key to timely and consistent processing and delivery of the mail. Postal Service automated processing equipment does not have the ability to interpret incomplete or incorrect addressing information. Therefore, an improperly addressed mail piece will likely be misdirected and require postal employees to “guess” at its eventual destination.

AutoMail™ PRO is available to banks as part of the WAUSAU Optima^{3®} Archive Solution, or as a stand-alone solution. AutoMail™ PRO delivers a world of features, benefits and opportunities.

With the continuing increase of postal rates, it's essential to maximize your mailroom efficiencies. Technology can be a strong and effective ally when it improves the quality of your work, shortens your processing time, and saves you money.

AUTOMAIL™ PRO SOFTWARE:

Counts pages, calculates weight and postage of each item automatically.

Sorts your mail using USPS certified and PAVE software.

Qualifies your mail for the lowest allowable postage rates.

Corrects addresses using USPS certified CASS software.

Improves accuracy of your mailing process.

Reduces the time and steps associated with the mailing process.

Saves you money on postage, equipment, labor, time, and errors.

Provides mailing manifest postal reports and tray tags.

AUTOMAIL™ PRO MAXIMIZES YOUR MAILROOM EFFICIENCIES:

Separates mail that qualifies for automated rates from mail that doesn't. This eliminates the need to use a postage meter by certifying every step of the process. It prints reports the Post Office requires to validate what the bank has done and the savings it's earned.

Includes Coding Accuracy Support System (CASS), a system developed by the USPS to provide accurate zip plus 4, delivery point and carrier route codes.

Includes Presort Accuracy Validation and Evaluation (PAVE) certification. PAVE provides a common platform to measure the quality of presort products and determines their accuracy in sorting address files according to the requirements set forth in the Domestic Mail Manual (DMM).

Formats your files to match the Post Office's latest automated mail standards.

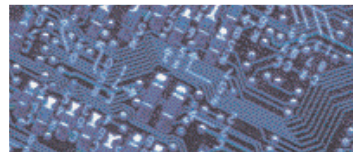

Complies 100%: Meets the USPS' zero tolerance requirements for automated mail presentment.
