

# Chain of Possession

Fewer Steps: Reduces Handling, Reduces Costs and Increases Security

## AutoMail® PRO

Data to print to delivery: A more efficient and secure mailroom process.

**CASS™ Coding** – Verifies address accuracy and presentment, generates postnet barcode and increases deliverability.

**PAVE™ Sorting** – Eliminates external, third party presort service. Presorts internally for postal discounts and increases speed and accuracy of delivery.

**Manifesting** – Eliminates metering, reduces handling and the likelihood of lost statements; in addition it increases the tracking of statements from “Host to Post.”

CASS™ and PAVE™ are registered trademarks of The U. S. Postal Service®. AutoMail® is a registered trademark of SYNTEL™LLC.
